(507) 400-5029 • kozić.alexander@gmail.com • www.alexanderkozić.com

SKILLS

Frameworks & Technical Skills: React, SQL, Git, QGIS, Jest, Flask, REST API, AWS, TeamCity, Docker, NumPy

Programming Languages: Java, Python, TypeScript, JavaScript, CSS, HTML

Languages: English, French, German, Russian

EDUCATION

Bowdoin College Brunswick, ME

May 2024

Major: Computer Science, Russian; GPA: 3.96

Awards: Cum laude, Sarah and James Bowdoin Scholar, Book Award Winner, NESCAC Champion, Team MVP

Relevant Coursework: Data Structures, Algorithms, Software Engineering, AI, Financial Machine Learning

WORK EXPERIENCE

ForeFlight Portland, ME

May 2024 – August 2024

Data Integration Intern

- Calculated intersection takeoff distances to expedite takeoff calculations for pilots
- Performed calculations through analysis of Shapely polygons representing airport runway features, verifying results on QGIS
- Inserted 72,868 rows of intersection takeoff data into the Foreflight database using PostgreSQL, while navigating the process of table creation, data transformation and merge logic with existing data
- Employed TeamCity to perform integration testing of project

ForeFlight Portland, ME

May 2023 – August 2023

Software Engineer Intern

- Upgraded ForeFlight's internal tooling from a dated desktop application to a modern web application using TypeScript and React, expediting internal teams' ability to find and scrub NOTAMs (Notices to Airmen), a mission-critical product
- Utilized agile development cycle through attending daily team stand-ups, receiving feedback on JIRA tickets, and completing a robust web page adhering to user stories while catering to scalability

Bowdoin College Brunswick, ME

August 2021 - May 2024

Proctor

- Shaped the culture of residential life staff by directly overseeing and mentoring 6 other members of staff
- Created an inclusive campus environment by gauging and addressing campus needs at 4 weekly meetings with pro staff

PROJECTS

NHL Game Predictor

- Implemented a logistic regression model to predict NHL game outcomes using web-scraped player statistics
- Selected optimal feature combination to maximize accuracy
- Pre-processed data by normalizing player stats by games played and handling null values for rookies
- Evaluated model performance achieving an accuracy of 67.68%

NOTAM Web Viewer

- Used TypeScript and React to construct a table with filtering, sorting, hiding, and pagination capabilities
- Ensured application functionality by unit testing with Vitest and integration testing with Playwright
- Styled an elegant webpage with light/dark mode preference capabilities in CSS and SCSS

alexanderkozić.com

- Created a Next.js personal website with TypeScript and React displaying my personal portfolio
- Navigated project life cycle from planning to deployment utilizing iterative model allowing further scaling of webpage
- Styled webpage with Tailwind CSS to adhere to various screen sizes and ensure optimal user experience

LEADERSHIP, ACTIVITIES, AND INTERESTS

Bowdoin College Men's Ice Hockey Team

August 2020 – May 2024

- Maintained a steady student-athlete schedule with 30+ hours of training and competition per week
- Led 4 monthly Diversity Equity and Inclusion talks on topics such as Kingian Nonviolence, LGBTQ+, and systemic barriers

Interests: Guitarist and singer, Bowdoin chess champion 2021, die-hard New York Rangers fan
